No 71

At our present camp
No 5 there is almost a
pure stand of Melaleuca
uncinata growing to
a height of 10-14 feet
forming a patch of
Melaleuca scrub. The
vegetation is to be a
disturbance through
small community
habitat & I have not
noticed any previous
similar stands - or very
few.

Today the roads are the
last mile or so, bound
to be rough and heavy
going for the Utilities

Lee Silver P-10

[illegible]

W165 05 [illegible]

W165 06 [illegible]

Does anyone (Lord) Zonotrichia / warbler / Sparrow and [illegible]

The pair Claude believe to have been the pair he watched yesterday in necessity of homeguarding. Neal & I were [illegible] that they've been collecting this morning. She had one marked as Claude observed them to be yesterday which the early could be known from the q (some clearly) was a "cac cac" note not unlike Swallows Rough-wing. Movements on 3-4 times

The ♂ gave [illegible] flight

Berchtesgaden Kalk F. Hallstatt Class V

P. S. 24-31, Modification
of p. 55

Frequently known as bull mallee.
Trees tall, up to 25 feet, stems thick.
Scrub relatively open through canopy
complete. Shrub occurs, not prominent
Various grasses.

Dix Eyre Hills P. 18 - 19.

Fruticose Alpine Class III

Whipcord Heath. Stems thin & wiry seldom exceeding 6 ft in height. Smooth dense. Shrubs plummet/ but not as common as in Class II, & very few herbs grow at any level

Bird species Noted:

(Frenchs Model Site) II

Tall rudaceous mallee, forming
(broken canopy. Rich shrub layer
and floor of scrub very open. Numerous
fallen trees. Regrowing. Composition
of shrubs in burnt areas by Scrub Pine
Callitris verrucosa sometimes thickets;
Broom Bush Melaleuca uncinata
often dominant (patches)

Birdsperies noted: 24-31

Fridtj. Møller Class I

E. viridis ("Green Heather") present.
Shrub layer varies - dense to
impenetrable.

Birdsmarsh Notes: 24 - 31
